

Bacteria Sampling Report

Waterbody:
Six Mile Lake

Six Mile Lake

Date Sampled:
7/16/2020

Location	<i>E. coli</i>	Total Coliforms	Interpretation
#1	389		● Water is UNSAFE for swimming! RETEST <i>E. coli</i> BEFORE SWIMMING!
#2	40.0		● Water meets bacteriological standards for safe swimming.
#3	8.0		● Water meets bacteriological standards for safe swimming.

Bacterial counts are expressed as the number of Colony Forming Units per 100 milliliters (CFU/100mL).

For full body contact recreation (including swimming) counts of *E. coli* should not exceed 130 (CFU/100mL) as a monthly geometric mean of at least five samples per the State of Michigan standard, or single samples should not exceed 298 (CFU/100mL) [235 CFU/100mL in a designated bathing beach area] per Federal (EPA) guidelines.

Current recreational water quality standards do not rely on Total Coliform counts.
